KP GROUP: A SUN DROP OF GREEN ENERGY, REFLECTIONS OF TOMORROW

India's clean energy transition is accelerating. KP Group is building an integrated renewable ecosystem across solar, wind, hybrid power, battery storage, engineering and infrastructure to support the nation's evolving energy needs.

Financial Performance

In Q1 FY27, the Group's portfolio reached 9.2 GW, comprising 3.2 GW commissioned and 5.97 GW under development. KPI Green Energy and KP Energy reported combined revenue of ₹1,231 crore, up 47% from ₹835 crore in Q1 FY26. Combined EBITDA rose 21% to ₹324 crore from ₹267 crore; cash profit increased 7% to ₹212 crore from ₹199 crore; PAT was ₹121 crore.

Core Strengths

Capabilities include a 12,104-acre land bank, 5.10 GW of evacuation capacity, in-house manufacturing, Asia's largest galvanizing plant and world's first GH2

blended galvanising, AI-enabled NOC center powered by IBM Maximo, 840+ waterless cleaning robots and 2,200 km of power transmission network. Teams provide end-to-end solar, wind and BESS solutions.

Business Development

The Group's execution capabilities are reflected in renewable energy projects. Group is expanding into battery storage and floating solar. KPI Green Energy has agreements for 565 MW/1,130 MWh of standalone BESS capacity and is executing a 142 MW floating solar EPC project at Kadana Dam. KP Green Engineering adds engineering, manufacturing and infrastructure capabilities.

Leadership

KP Group is strengthening its leadership team to advance disciplined growth, operational excellence and sustainable development.

"Our vision extends beyond clean energy generation. We are building an integrated renewable ecosystem that creates long-term value for industries, communities and the nation while contributing to the global energy transition."

– Dr. Faruk G. Patel, Founder and Chairman & Managing Director of KP Group.
